C.Q.R.iT® advantages
pronounced 'Secure It'

THE BEST KEY MANAGEMENT SOLUTION ON THE MARKET

Smarter

More secure

Intuitive software

100% Australian made

BETTER PHYSICAL SECURITY

There's nothing plastic about a C.Q.R.iT®! Metal locks, metal keys and metal Tamper-Proof Key Rings®.

It's as easy as turning a key - our solid holder keys aren't susceptible to dirt or breakage. They just work!

Even the door has a two-point locking system.

OVERRIDE KEY

Each cabinet has an override key which is used to access the electronics for upgrades or services. Some other products on the market use the same key for EVERY cabinet worldwide. We provide a unique key to every customer meaning no one else can break into your cabinet.

EASIER TO USE

Less time spent at cabinet - key #1 is removed and returned to position #1 first time AND every time, which means fewer queues during peak times.

No confusion - the display screen on the cabinet gives you all the information you need, plus the status of each key position is provided by a multi-coloured LED (off, green, orange or red).

The software is the most user-friendly and technically-advanced on the market. Even the most complex key access arrangements are simple.

PLAYS WELL WITH OTHERS

Whatever access control you already use, C.Q.R.iT® will integrate with it seamlessly.

Access can be granted using any biometric input, even facial recognition.

AUSTRALIAN MADE

100% Australian owned and made, this cabinet looks good because it is!

We maintain our own R&D unit in the Nation's Capital - not only do we continue to advance the capabilities of our system, but our levels of customer support are second-to-none.

KEY RINGS

The key rings we use are the best on the market.

Constructed of stainless steel, they seal permanently into a continuous loop. No plastic joins that are both weak and bulky.

Available in solid or flexible, they are uniquely serialised making substitution without detection impossible.

The C.Q.R.iT® range is a self-sufficient key management system that does all the legwork. It's easy to use, reliable and secure!
