Agility™ 3

Agility™ 3 comes with a full range of accessories, offering you a complete home security solution

Security

A complete range of wireless indoor, outdoor and perimeter detectors including motion detectors with integrated cameras that can take snapshots of an event happening inside your home.

Safety

Wireless smoke, gas, CO and flood detectors to keep your home safe.

Elderly Care

Gain peace of mind: water resistant wristbands and panic buttons available for the elderly that can alert you in case of emergency or lack of movement.

Additional accessories available for use with Agility™ 3

eyeWave™ Camera Detector:

Upgrade your security system by adding eyeWave™ Wireless PIR Camera detector enabling the visual verification capability.

LCD Keypad:

Full display, easy to use two-way Wireless LCD keypad displays in your language with integrated proximity reader for arm/disarm.

Slim LED Keypad:

Two-way wireless slim LED keypad allows full system user operation with door chime feature, also available in an outdoor version.

Remote control:

Handy pocket size two-way remote control, also programmable for arm/ disarm, stay, panic and output.

Agility™ 3 offers a new concept in home security systems, giving you total control at all times

A state-of-the-art wireless alarm system that offers you the best in home security. Connect to your home - either with the Smartphone application or your PC, and enjoy a host of benefits including the choice to view the inside of your home with the visual verification capability, and the option to arm or disarm the system, wherever you are.

All images taken are saved on the RISCO server, RISCO Cloud so that you always have a record of events, should you need it.

You decide, you're in control

Arm/ disarm your alarm system remotely

Self-monitor your home using visual verification

A full history of events is saved for when you need it

Ask your installer about the option of controlling your wireless security system from your Smartphone or PC

- Arm/disarm your alarm system remotely
- View full history of past events on the RISCO Cloud
- Verify alarm with real-time images of event using visual verification feature
- Receive alerts and notifications
