

ACC 5.0 Quick Guide

www.avigilon.com

Getting Started

Once the Avigilon Control Center Client software has been installed, you can start using the Avigilon High Definition Surveillance System immediately. Refer to any of the procedures in this section to help you get started.

Starting and Shutting Down the Avigilon Control Center Client

The Avigilon Control Center Client software can be started or shut down at anytime - video recording is not affected because it is controlled separately by the Server software.

Starting the Client Software

Perform one of the following:

- In Windows, select **All Programs** or **All Apps > Avigilon > Avigilon Control Center Client**.

- Double-click the  shortcut icon on the desktop.
- From the Avigilon Control Center Admin Tool, click **Launch Control Center Client**. See the *Avigilon Control Center Server User Guide* for more information.

Log in to your Site when the Log In dialog box appears. See [Logging In](#) for more information.

Shutting Down the Client Software

1. In the top-right corner, select  > **Exit**.
2. In the confirmation dialog box, click **Yes**.

Discovering Sites

If your computer is on the same network segment (subnet) as a Site, that Site is automatically discovered and displayed in the System Explorer on the left side of the application window.

If the Site you want to access is not listed, it is because the Site is on a different subnet and must be manually discovered. There is no limit to the number of Sites that can be discovered by the Client software.

By default, when a server is first connected to the system, it is added as a server within a Site of the same name. If you need to locate a new server, you would search for its Site.

1. Open the Find Site dialog box.
 - In the Log In dialog box, click .
 - In the top-right corner, select  > **Client Settings > Site Networking**. In the Site Networking tab, click .

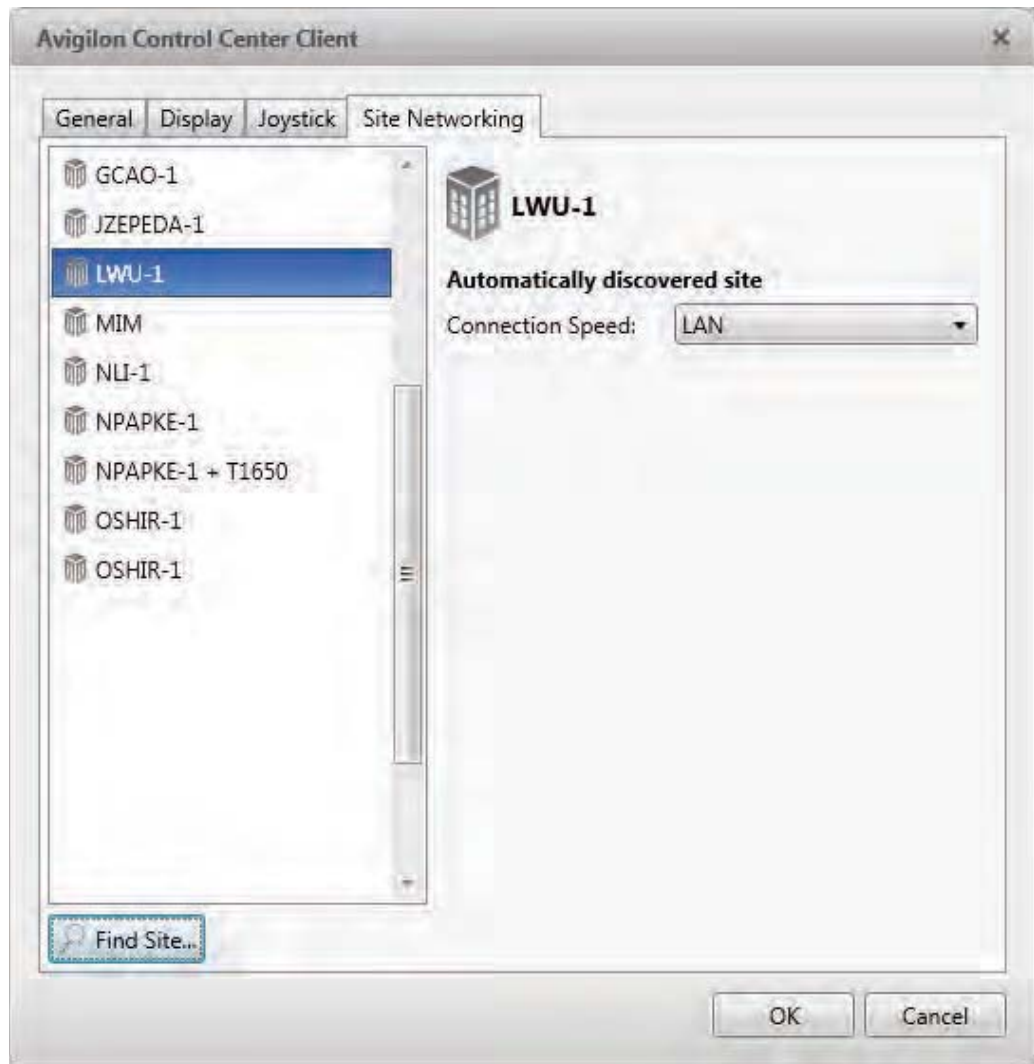

Figure A. Site Networking tab

2. In the dialog box, enter the **Hostname/IP Address** and the **Base Port** of the server in the Site you want to discover.

Figure B. Find Site dialog box

The base port is 8080 by default. You can change the base port number in the Avigilon Control Center client. See the *Avigilon Control Center Server User Guide* for more information.

Click .

If the Site is found, it is automatically added to the Site list in the Site Networking tab.

If the Site is not found, check the following then try again

- The network settings are configured correctly.
- The firewall is not blocking the application.
- The Avigilon Control Center Server software is running on the server you searched for in step 2.

Logging Into and Out of a Site

Logging In

1. Open the Log In dialog box. The Log In dialog box automatically appears when the client software is launched.
 - o To manually access the Log In dialog box, perform one of the following
 - o In the top right corner, select  **o In** to log in to all available Sites.
 - o In the System Explorer, right click a Site and select **o In** to log in to the selected server.
2. In the Log In dialog box, select a specific Site or select **All Sites** from the **o In to** dropdown list.

Figure A. Log In dialog box

If you accessed the Log In dialog box from a specific Site, you will not have the option of logging into All Sites.

If the Site you want to log into is not shown, click  to discover the Site.

- Enter your **user name** and **Password**, or select the **use current Windows credentials** checkbox if your system administrator has imported your Windows account information to the Site.
- Click **Log In**.

After logging in the first time, you can set up automatic login from the Client Settings dialog box. See [General Settings](#) for more information.

Logging Out

You can log out of one or all Sites at any time.

How to	Steps
Log out of one Site	<ul style="list-style-type: none"> 1. Right-click the Site in the System Explorer and select Log Out.
Log out of all Sites	<ul style="list-style-type: none"> 1. Select  Log Out. 2. In the confirmation dialog box, click Yes.

Navigating the Application

Once you log in, the Avigilon Control Center client application window is populated with all the features that are available to you.

Note Some features are not displayed if the server does not have the required license, or if you do not have the required user permissions.

Adding and Removing Cameras in a View

to monitor video, add a camera to the view. The camera video can be removed from the view any time.

Adding a Camera to a View

Perform one of the following

- Drag the camera from the System Explorer to an empty image panel in the view.
- Double-click a camera in the System Explorer.
- In the System Explorer, right-click the camera and select **Add to View**.

The camera is added to the next empty image panel in the view layout.

You can drag the same camera to multiple image panels to watch the video at different zoom levels.

Removing a Camera From a View

Perform one of the following

- Right-click the image panel and select **Close**.
- Inside the image panel, click .

Viewing Live and Recorded Video

Note Some features are not displayed if the server does not have the required license, or if you do not have the required user permissions.

When you monitor video, you can choose to watch live and recorded video in the same view, or only one type of video per view.

Once you've added the required cameras to the view, perform the following

- To switch the view between live and recorded video, click either  **Live** or  **Recorded** on the toolbar.
- To switch individual image panels between live and recorded video, right-click the image panel and select either **Live** or **Recorded**.

Image panels displaying recorded video have a **green** border.

Each transaction is separated by date and time, and the most recent transaction is highlighted in blue.

- To display cameras that are linked to the selected transaction source, click  in the Selected transaction image panel.

If multiple cameras are connected to the selected transaction source, you will be prompted to select one.

Controlling Recorded Video

Listed in this section are the features that are only available while monitoring recorded video.

Playing Back Recorded Video

The timeline displays when video was recorded and lets you control the video playback.

The colored bars on the timeline show the camera's recording history

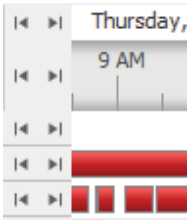

- A red bar shows the camera recorded a motion event.
- A blue bar shows the camera recorded video.
- White areas show that the camera did not record any video.
- An orange bar is a bookmark in the camera's recording history.

See [Bookmarking Recorded Video](#) for more information about bookmarks.

Figure A. Playback controls on the timeline

o	o t s
o select a playback time	<ul style="list-style-type: none"> • click the dark gray date display and select a specific date and time. • or, click a point in the timeline.

<p>to start playback</p>	<p>click .</p> <ul style="list-style-type: none"> click  to fast forward. click the arrow again to increase the playback speed. click  to rewind. click the arrow again to increase the playback speed. <p>You can play the video up to eight times the original speed.</p>	
<p>to stop playback</p>	<p>click .</p> <ul style="list-style-type: none"> click  to step forward one frame. click  to step backward one frame. 	
<p>to scroll forward or back on the timeline</p>		<p>on the timeline, click  or  to move to set points on the timeline.</p>
<p>to zoom in or out on the timeline</p>		<ul style="list-style-type: none"> move the slider on the bottom left to zoom in or out on the timeline. or, you can place your mouse over the timeline and use the scroll wheel to zoom in or out on the timeline. <p>You can zoom in to a quarter of a second, and zoom out to see years if recorded video exists.</p>
<p>to center the timeline on the time marker</p>		<p>right click the timeline, and select enter on ar er</p>
<p>to pan the timeline</p>		<ul style="list-style-type: none"> click and drag the time marker through the timeline. move the horizontal scroll bar under the timeline. or, right click and drag the timeline.

Bookmarking Recorded Video

You can add bookmarks to recorded video to help you find and review an event later. Bookmarked video can be protected against scheduled data cleanup so the video is never deleted.

Adding a Bookmark

You can add a bookmark any time the timeline is displayed.

1. Drag the timeline marker to where you want to start the bookmark, then right click the timeline and select **Add Bookmark**.

The edit bookmark dialog box appears, and the bookmark time range is highlighted on the timeline.

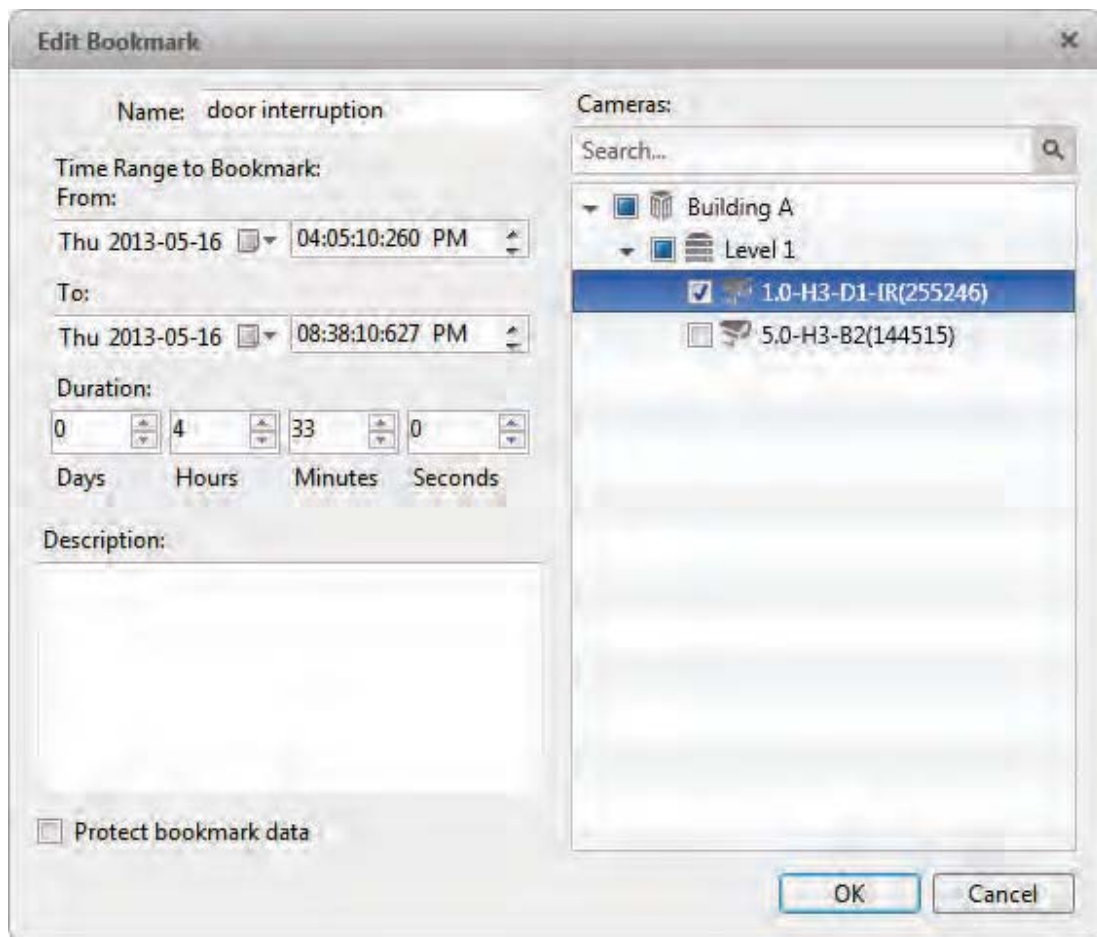

Figure A. Edit bookmark dialog box

2. Enter a name for the bookmark.
3. In the cameras pane, select all the cameras that need to be attached to this bookmark.

Note You can only book mark multiple cameras from the same Site.

- In the **Time Range** to book mark area, enter the full duration of the book mark. You can also move the black time range markers on the timeline to adjust the time range.
- In the **Description** field, enter extra any information you want to include with the book mark.
- To protect the book mark video from being deleted, select the **Protect from deletion** check box.

Note Protected book marks are never deleted. Be aware that book marked video take up space and can become the oldest video on the server.

- Click **OK**.

Editing, Deleting or Exporting a bookmark

- Click the book mark on the timeline then perform one of the following

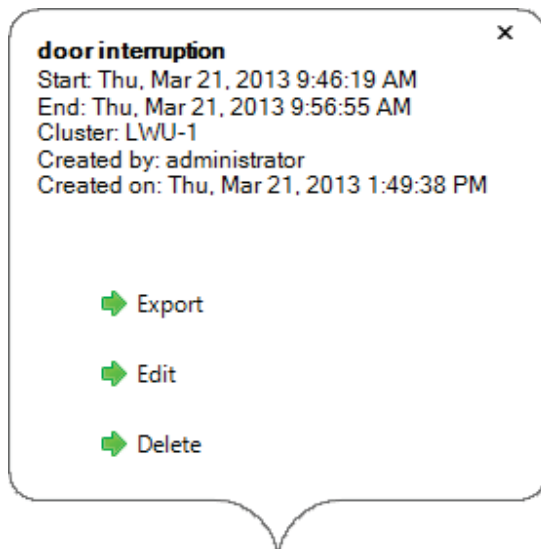

Figure B. Book mark properties

Operation	Steps
Edit a book mark	Click Edit then make your changes.
Delete a book mark	Click Delete . When the confirmation dialog box appears, click Yes .
Export a book mark	Click Export then complete the export tab.

When editing a book mark, refer to [Editing a Book Mark](#) for details about the editable options.

When exporting a book mark, refer to [Exporting](#) for information about the export options.

Performing a Pixel Search

The Pixel Search allows you to search for tiny pixel change in specific areas in the camera's field of view.

- In the New task menu, click 
 - The Search Pixel tab displays.

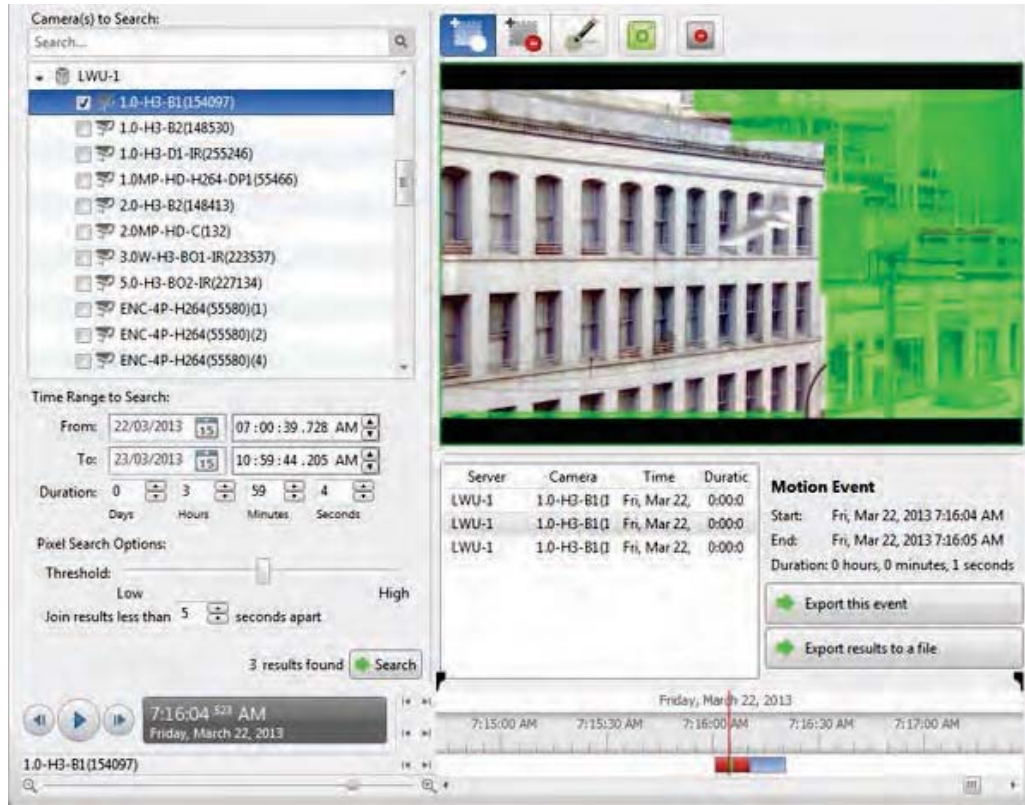

Figure A. Search Pixel tab

- By default, the entire search image panel is highlighted in green.
- In the camera to Search area, select a camera.
- In the time range to Search area, set the date and time range of your search. The time range is highlighted on the timeline by the black time range markers. You can also drag the time range markers to modify the time range.
- Refine the pixel search area by using the motion detection tools above the image panel. Only areas highlighted in green are searched.
 - If you are looking for something very specific, limit the green area to a dot to find what you're looking for more quickly.
- In the Pixel Search options area, drag the **Resolution** slider to select the amount of motion required to return a search result.
 - High threshold requires more pixels to change before results are found.
- Enter a number in the **Minimum Results** field to set the minimum number of seconds between separate search results. You can enter any number between 1 and 30 seconds.
- Click **Search**.

- In the Pixel Search Options area, drag the **resolution** slider to select the amount of resolution required to return a search result.
- A high threshold requires more pixels to change before results are found.
- Enter a number in the **minimum results** field to set the minimum number of seconds between separate search results. You can enter any number between 1 and 30 seconds.
- Click **Search**.

Viewing Pixel Search Results

- In the Search Results area, select a search result. The event is highlighted on the timeline and the video is displayed in the image panel. Details about the search result are displayed to the right.
- Use the timeline controls to review the event.
 - See [Laying Back Recorded Video](#) for more information.
 - Click **Export Selected** to export the selected event video.
 - See [Export](#) for more information.
 - To export all listed search results, click **Export Results to a File** and save the file. The search results can be saved as either a CSV or XML file.

Performing a Thumbnail Search

The thumbnail search is a visual search that displays the search results as a series of thumbnail images.

- In the New Task menu, click .
- The Search thumbnails tab displays.

Figure A. Search thumbnails tab

2. In the **Area to Search** area, select a camera.
 - In the **Time Range to Search** area, set the date and time range of your search. The time range is highlighted on the timeline by the black time range markers. You can also drag the time range markers to modify the time range.
 - In the **Image Panel**, move or drag the edges of the green overlay to focus the search on one area in the video image.
 - Only the area highlighted in green is searched.
 - Click **Search**.

Viewing Thumbnail Search Results

The search results display thumbnails at equal intervals on the timeline.

- To change the size of the search result thumbnails, select **Medium Thumbnails**, or **Small Thumbnails** or **Large Thumbnails**.

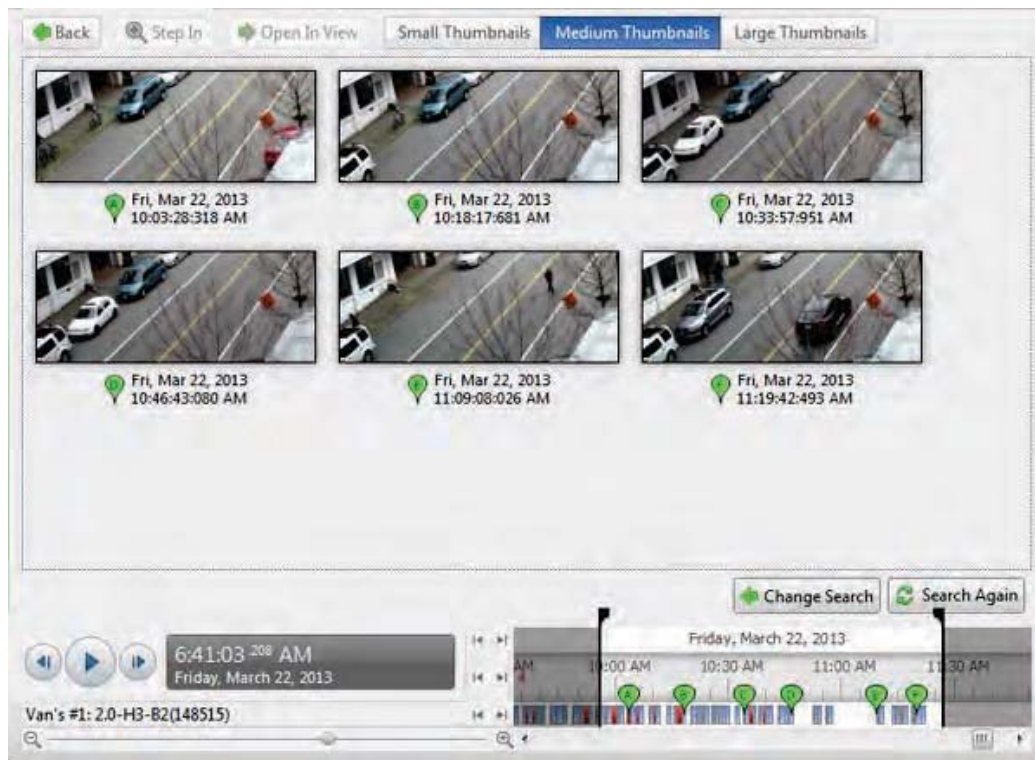

Figure B. Search thumbnail results tab

2. Select a thumbnail to highlight the video on the timeline.
 - Click **Step In**, or double click the thumbnail to perform another search around the thumbnail.
 - Click **Back** to return to the previous results page.
 - Click **Open In View** to open the recorded video in a new view.
 - Click **Change Search** to change the search criteria.
